BAND STORY

" The Synthetic Dream Foundation coalesced as an experimental music band during the harsh, freezing seasons of late 2001. Though in that short time frame has gardened a pallete of sound which is comparable to the glittering of phosphorescent life on the bottom of a cold, blackened sea. From harsh, brooding, mechanical beats to dreamy, neo-classical mirages, and dark ambient masterworks which shift through and absorb cold, alien landscapes. TSDF is not limited by genre, but instead compelled by the infinite possibilities that electronic advancements bestow upon the musical and artistic forms. "
